# ABOUT US

Established in 2000 as the result of a merger of two of the UK's leading suppliers of computer systems to the metals industry Metalogic has gone on to be the major supplier of specialist software to the metals market in the UK and Europe.

Metalogic's customers handle every form of material including Coil, Sheet and Plate, Bars, Sections, Meshes, Pipe and Tube, Fittings and Manufactured Components, Billets and Ingots. They also undertake every kind of process that these products are subject to from Decoiling, Slitting and Shearing, through to Plate and Bar Sawing, Profiling, Rolling and all forms of machining including finishing processes such as Shot Blasting, Painting, Polishing, Poly-Coating and Testing.

Offering multi branch, multi-product and multi process functionality Metalogic systems are installed at every type of metals processing and distribution business. The products are highly scalable and can be efficiently and cost effectively implemented and supported in businesses ranging from 5 to over 700+ users.

To complement their global market Metalogic also handle all currencies, tax requirements and localisation on accounts through their partnership with Sage, one of the world's leading accounts packages.

In the rapidly changing world of the metal service centre, it is essential companies maintain a competitive advantage. Information is of vital importance to the modern business, and with customers and staff demanding quicker and faster services, you can't afford for it to be inaccessible. Metalogic offer an extensive range of management information systems to facilitate this.

# PRODUCTS AND SERVICES

## **iMetal**

An industry specific package, designed to fit its diverse and competitive user base, iMetal can provide this advantage by maximising commercial opportunity while minimising administrative and business costs.

## **iMetal Server**

An e-commerce solution designed by Metalogic to automate transactions between customers and suppliers throughout the supply chain.

## **Additional Services**

Metalogic offers its clients full turn-key Network and Infrastructure planning, installation and support service. This means we act as a "one stop shop" in carefully defining your Local and Wide Area Network Infrastructure requirements, finding and supplying the optimum solution, and setting up and installing the infrastructure on site. In addition to our Metals Industry specific Core Systems and Advanced Functionality Modules, we also offer a full range of ICT Consultancy Services, configuration, implementation and support service.

## **iMetal Scan**

The perfect solution to providing fast and secure access to your valuable information, both internally and externally, no matter how large or small your organisation or document demand.

## **iMetal Forms**

Documents are created in Adobe PDF Format, an industry standard for creating high quality documents for delivery either in hardcopy or electronic format.

## **iMetal Scan AI**

An advanced development of iMetalScan – iMetalScanAI – has been integrated with iMetalForms, Metalogic's Advanced Document Creation and Distribution System to allow any documents to self index when scanned.

## **iMetal Market CRM**

A customer relationship management system that provides you with the tools for sharing the information your company needs to ensure that you effectively manage, satisfy and retain your customers.

# Our customers don't care how much we know, until they know how much we care

Our customer facing team members have many years' experience working in and supplying the metal sector with functionally specific software. Our consultants are focused on delivering results with the minimum of cost and the maximum attention to detail ensuring you get a return on your investment not just a good looking set of screens.

**It is this distinction that puts Metalogic ahead of other suppliers who offer generic solutions to this specialist sector.**

As a member of one of the world's fastest growing companies – Constellation Software Inc, we have the backing of a major organisation meaning we are small enough to care but big enough to take on the largest of challenges. With our sister organisation Compusource in the USA we offer exceptional support that stretches around the globe giving outstanding service from people who work in the business and who care about our clients with a dedication that goes above and beyond the call of duty.
